Figure 17.14.1: Standard fragment for 1.6 article fragment impact test

Notes:

Shape: a conical ended cylinder with the ratio  $\frac{L \text{ (length)}}{D \text{ (diameter)}} > 1$  for stability;  
Tolerances:  $\pm 0.05 \text{ mm}$  and  $\pm 0^\circ 30'$ ;  
Fragment mass: 18.6 g;  
Fragment material: a mild carbon steel with a Brinell Hardness (HB) less than 270.
