Foreword

This Japanese Industrial Standard has been established by the Minister of Land, Infrastructure, Transport and Tourism through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by National Institute of Advanced Industrial Science and Technology (AIST)/Japanese Standards Association (JSA) with a draft being attached, based on the provision of Article 12, paragraph (1) of the Industrial Standardization Act.

This **JIS** document is protected by the Copyright Act.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, published patent application or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, published patent application or utility model rights.

JIS A 1291 series consists of the following 2 parts under the general title *Test method for adsorption performance of attenuation layer* — :

Part 1 : Batch test

Part 2 : Column test

Test method for adsorption performance of attenuation layer — Part 2: Column test

1 Scope

This Japanese Industrial Standard specifies the column adsorption test method for evaluating the adsorption properties of attenuation layer materials used for attenuation layer method, which are applied as a countermeasure against the leaching of naturally occurring heavy metals and other substances from excavated soil and rock.

This Standard is not applicable to soil not to be mixed with sorbents.

2 Normative references

Part or all of the provisions of the following standards, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS A 0207 *Technical terms for geotechnical engineering*

JIS A 1203 *Test method for water content of soils*

JIS K 0102-2 *Testing methods for industrial water and industrial wastewater — Part 2: Inorganic anions, ammonium ion, organic nitrogen, total nitrogen and total phosphorus*

JIS K 0102-3 *Testing methods for industrial water and industrial wastewater — Part 3: Metals*

JIS K 0130 *General rules for electrical conductivity measuring method*

JIS K 0557 *Water used for industrial water and wastewater analysis*

JIS K 8180 *Hydrochloric acid (Reagent)*

JIS K 8541 *Nitric acid (Reagent)*

JIS K 8576 *Sodium hydroxide (Reagent)*

JIS Z 8801-1 *Test sieves — Part 1: Test sieves of metal wire cloth*

JIS Z 8802 *Methods for determination of pH of aqueous solutions*

3 Terms and definitions

For the purpose of this Standard, the following terms and definitions, and those given in JIS A 0207 apply.

3.1

naturally occurring heavy metals and other substances

hazardous substances naturally present in soils
