JAPANESE INDUSTRIAL STANDARD

J I S

Steel and aluminium alloy
venetian blinds

A 4801-1991

1. Scope

This Japanese Industrial Standard specifies the venetian blinds for the room interior which consist of a large number of steel or aluminium alloy slats assembled horizontally and are capable of changing the angle of slats, and of raising and lowering the slats and the bottom rail by hand operation (hereafter referred to as the "blind").

Remarks 1. The applicable standards to this Standard are shown in Attached Table 1.

2. The units and numerical values given in { } in this standard are in accordance with the traditional unit system, and are appended for reference.

2. Name of main component parts

The name of each part of blind shall be as given in Fig. 1, Fig. 2, and Fig. 3.
