Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry, through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Wallcoverings Association of Japan (WACOA)/ Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS A 6921**: 2003 is replaced with this Standard.

However, **JIS A 6921**: 2003 may be applied in the **JIS** mark certification based on the relevant provisions of Article 19 Clause 1, etc. of the Industrial Standardization Law until July 21, 2015.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Wallpaper and wallcoverings for decorative finish

Introduction

This Japanese Industrial Standard was established in 1976 and has gone through five revisions to this day. The last revision was made in 2003, and it has been revised this time for the purpose of alteration of the technical matters such as testing method.

The corresponding International Standard has not been established at this point. The comparison table between previous and current editions of this Standard on technically significant revisions is given in Annex C.

1 Scope

This Standard specifies the wallpaper and wallcoverings to be stuck mainly on the wall, ceiling, etc. of the building as interior finish.

The wallpaper and wallcoverings defined herein mean the wallcovering product of paper, fibre, inorganic material (including metallic foil), plastics (polyvinyl chloride resin, ethylene vinyl acetate copolymer resin, acrylic resin, etc.) and their combination.

Moreover, this Standard is applicable to materials coated previously with adhesives, pressure sensitive adhesives, etc.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS A 6922 *Adhesives for wallpaper and wallcoverings for decorative finish and TATEGU*

JIS K 7362 *Plastics — Determination of changes in colour and variations in properties after exposure to daylight under glass, natural weathering or laboratory light sources*

JIS K 8001 *General rule for test methods of reagents*

JIS L 0805 *Grey scale for assessing staining*

JIS L 0842 *Test methods for colour fastness to enclosed carbon arc lamp light*

JIS L 0849 *Test methods for colour fastness to rubbing*

JIS P 8113 *Paper and board — Determination of tensile properties — Part 2 : Constant rate of elongation method*

JIS R 3503 *Glass apparatus for chemical analysis*

JIS Z 8401 *Guide to the rounding of numbers*
