Foreword

This Japanese Industrial Standard has been revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Society of Piping Engineers of Japan (JSPE)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS B 0151**:2001 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Iron and steel pipe fittings—Vocabulary

Introduction

This Japanese Industrial Standard was established in 1973 and has gone through three revisions up to the present. The last revision was made in 2001, and the revision at this time is to respond to the revisions of other related Japanese Industrial Standards.

No corresponding International Standard has been established at this point.

1 Scope

This Standard specifies the terms and definitions relating to the iron and steel pipe fittings used for iron and steel piping through which a fluid such as steam, water, gas or air flows.

2 Classification

The terms are classified as given below.

- a) Fundamentals
- b) Connection type
- c) Fixed fittings
 - 1) Pipe fittings
 - 2) Necked pipe fittings
 - 3) Pipe flange
- d) Adjustable fittings
 - 1) Adjustable type
 - 2) Bellows type

3 Terms and definitions

Terms and definitions are as follows.

In the list, equivalent terms in English are given as reference.

NOTE 1 The term (Japanese character) given with parentheses “()” denotes that both (term with the characters in parentheses or term without the characters in parentheses) may be used, but the former has a priority. If not confusable, the latter may be used.

NOTE 2 The numeral in parentheses affixed to the term in the sentence in Definition column denotes the “No.” of relevant term in this Standard.

NOTE 3 Figures are examples.
