Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal of establishing a Japanese Industrial Standard from The Japan Small Cutting Tool's Association (JSCTA)/the Japanese Standards Association (JSA), with a draft of Industrial Standard based on the provision of Article 12 Clause 1 of the Industrial Standardization Law. By this establishment, **JIS B 0176 : 1996** has been withdrawn and replaced with **JIS B 0176 : 2002** Parts 1 to 4.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

JIS B 0176 consists of the following four parts with the general title *Threading tools—Vocabulary*.

Part 1 : Taps

Part 2 : Thread cutting dies

Part 3 : Chaser

Part 4 : Thread rolling dies

Date of Establishment: 2002-07-20

Date of Public Notice in Official Gazette: 2002-07-22

Investigated by: Japanese Industrial Standards Committee

Standards Board

Technical Committee on Machine Elements

Threading tools—Vocabulary

Part 3 : Chaser

1 Scope This part of **JIS B 0176** specifies terms and definitions related to the chaser⁽¹⁾ to be used mainly for metal workings in general.

Note (1) The generic name of multi-threads cutting edged tools.

2 Classification The terms shall be classified as given in the following:

a) Types of chaser

- 1) Classification according to cutting part materials and surface treatment
- 2) Classification according to structure
- 3) Classification according to functions or uses
 - 3.1) Classification according to manufacturing methods
 - 3.2) Classification according to uses
 - 3.3) Classification according to types of screw threads
 - 3.4) Classification according to feature of cutting parts

b) Elements of chaser

c) Angles of chaser

d) Accuracy of chaser

e) Damage on cutting parts of chaser

f) Chaser in general

3 Classification of chaser The names expressing the types of the chaser shall be read combining the terms corresponding to the order of type number **2 a) 1)** to **2 a) 3) 3.4)**. However, the manufacturing methods shall be omitted, and the classification according to the type of screw thread shall follow the classification of cutting part material and surface treatment. In addition, the type of screw thread may be changed to the designation of screw threads (see Table 1).
