Introduction

This Japanese Industrial Standard has been prepared based on the second edition of IEC 60384-20-1 published in 2008 without modifying the technical contents.

The portions with dotted underlines are the matters not given in corresponding International Standard.

Blank detail specification

A blank detail specification is a supplementary document to the sectional specification, JIS C 5101-20, and contains requirements for style and layout and minimum content of detail specifications. Detail specifications not complying with these requirements may not be considered as being in accordance with Japanese Industrial Standards nor shall they so be described.

In the preparation of detail specifications, the content of 1.4 of JIS C 5101-20 shall be taken into account.

The numbers between parentheses on the first page of the detail specification which is the second page of this Standard, correspond to the following information which shall be inserted in the position indicated.

Identification of the detail specification

- (1) The “International Electrotechnical Commission (IEC)” or the National Standards Organization under whose authority the detail specification is drafted.
- (2) The IEC or National Standards number of the detail specification, year of issue and any further information required by the national system.
- (3) The number and issue year of the IEC or national generic specification.
- (4) The National Standards or IEC number of the blank detail specification.

Identification of the capacitor

- (5) A short description of the type of capacitor.
- (6) Information on typical construction (when required in the detail specification).

NOTE : When the capacitor is not designed for use in printed-board applications, this shall be clearly stated in the detail specification in this position.

- (7) Outline drawing with main dimensions which are of importance for interchangeability and/or reference to the national or international documents for outlines. Alternatively, this drawing may be given in Annex to the detail specification.
