Foreword

This Standard has been prepared by the proposal for revision of the Japanese Industrial Standard furnished with the draft of Industrial Standard from Japan Electric Lamp Manufacturers Association (**JELMA**)/
Japanese Standards Association (**JSA**) based on Clause 1, Article 12 applied according to Article 14 of the Industrial Standardization Law and revised by the Minister of International Trade and Industry through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law. Consequently, **JIS** C 7510: 1992 is replaced with **JIS** C 7510: 2000.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Date of Establishment: 1950-03-13

Date of Revision: 2000-03-20

Date of Public Notice in Official Gazette: 2000-03-21

Investigated by: Japanese Industrial Standards Committee

Divisional Council on Electricity

JIS C 7510:2000, First English edition published in 2001-10

Incandescent lamps for bicycle dynamo lamps

Chapter 1 General

1.1 Scope This Japanese Industrial Standard specifies the incandescent lamps used for bicycle dynamo lamps (hereafter referred to as "lamps") which satisfy the following requirements:

Rated voltage: 6 V

Shape of glass bulb: G, B or T

Cap: E10/13 or EP10/14 \times 11

Remarks: The shape and dimensions of the caps are as specified in JIS C 7709-1.

1.2 Normative reference The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The normative references without the indication of the year of coming to effect (or the year of publication) apply limiting only to the most recent edition.

JIS B 7507 Vernier, dial and digital callipers

JIS C 1102-2 Direct acting indicating analogue electrical measuring instruments and their accessories Part 2: Special requirements for ammeters and voltmeters

JIS C 1609 Illuminance meters

JIS C 7709-1 Lamp caps and holders together with gauges for the control of interchangeability and safety Part 1: Lamps caps

Remarks: The particulars cited from **IEC 60061-1**: 1969 Lamp caps and holders together with gauges for the control of interchangeability and safety. Part 1: Lamp caps are equivalent to the relevant particulars in this Standard.

JIS C 7709-3 Lamp caps and holders together with gauges for the control of interchangeability and safety Part 3: Gauges

Remarks: The particulars cited from **IEC 60061-3**: 1969 Lamp caps and holders together with gauges for the control of interchangeability and safety.

Part 3: Gauges are equivalent to the relevant particulars in this Standard.

JIS C 7710 Designation method for glass bulbs of lamps

Remarks: The particulars cited from IEC 60887: 1988 Glass bulb designation system for lamps are equivalent to the relevant particulars in this Standard.

JIS C 7801 General rules of testing method for lamps

JIS C 9502 Dynamo lamps for bicycles
