Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Electric Lamp Manufacturers Association (JELMA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS C 7525** : 2003 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Reflector incandescent lamps

Introduction

This Japanese Industrial Standard was established in 1964 and has gone through 4 revisions to this day. The last revision was made in 2003. This time the normative references have been reviewed and the content, the composition and the wording, etc. have been revised over the entire standard.

Further, no International Standard corresponding to this Standard has been established at this point.

1 Scope

This Standard specifies reflector incandescent lamps (hereafter referred to as “lamps”) which comply with the requirements specified in **JIS C 7551-1** and also satisfy the following conditions :

Rated power consumption 40 W or over up to and including 200 W

Rated voltage 100 V

Shape of glass bulb Type R

In addition, the shape and name of glass bulb are in accordance with **JIS C 7710**.

Cap E26/25

In addition, the type and dimensions of cap are in accordance with **JIS C 7709-1**.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS B 7507 *Vernier, dial and digital callipers*

JIS C 7551-1 *Incandescent lamps — Safety specifications — Part 1 : Tungsten filament lamps for domestic and similar general lighting purposes*

JIS C 7709-1 *Lamp caps and holders together with gauges for the control of interchangeability and safety — Part 1 : Lamp caps*

JIS C 7709-3 *Lamp caps and holders together with gauges for the control of interchangeability and safety — Part 3 : Gauges*

JIS C 7710 *Designation method for glass bulbs of lamps*
