## Foreword

This Japanese Industrial Standard has been revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Japan Electrical Manufacturers' Association (JEMA) with a draft being attached, based on the provision of Article 12, paragraph (1) of the Industrial Standardization Act applied mutatis mutandis pursuant to the provision of Article 16 of the said Act. This edition replaces the previous edition (**JIS C 9613** : 2007), which has been technically revised.

This **JIS** document is protected by the Copyright Act.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, published patent application or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, published patent application or utility model rights.

Blank

# Hairdryers

## 1 Scope

This Japanese Industrial Standard specifies requirements for hand-held hairdryers (hereafter referred to as equipment) with a built-in blower and electric heater of which rated voltage is 300 V or under for single phase a.c., rated frequency is 50 Hz and/or 60 Hz, and rated power consumption is 1 500 W or under, excluding hairdryers for special purposes, such as steam type and iron type.

This Standard specifies requirements for the following different types of hairdryers separately in the main body and in Annex A, depending on the applicable standards.

- a) Type A : Standards unique to Japan are applied.
- b) Type B : Standards of **JIS C 9335-2-23** are applied.

**NOTE** Standards unique to Japan refers to the interpretation of the technical standards of the Electrical Appliances and Materials Safety Act (Appended Table 8 standards).

When requirements in the main body (Type A) are applied, the requirements in Annex A (Type B) do not apply. Similarly, when requirements in Annex A (Type B) are applied, requirements in the main body (Type A) do not apply.

## 2 Normative references

Part or all of the provisions of the following standards, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS C 1509-1 *Electroacoustics — Sound level meters — Part 1 : Specifications*

JIS C 1509-2 *Electroacoustics — Sound level meters — Part 2 : Pattern evaluation tests*

JIS C 2520 *Wires and rolled wires for electrical heating*

JIS C 3301 *Rubber insulated flexible cords*

JIS C 3306 *Polyvinyl chloride insulated flexible cords*

JIS C 5101 (all parts) *Fixed capacitors for use in electronic equipment*

JIS C 8303 *Plugs and receptacles for domestic and similar general use*

JIS C 8358 *Appliance couplers for domestic and similar use*

JIS C 9335-2-23 *Household and similar electrical appliances — Safety — Part 2-23 : Particular requirements for appliances for skin or hair care*

JIS C 9603 *Ventilating fans*
