Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by The Japan Iron and Steel Federation (JISF) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

JIS G 1257 series consists of the following 32 parts under the general title “*Iron and steel—Atomic absorption spectrometric method*”:

JIS G 1257-0 *Part 0: General rules*

JIS G 1257-1 *Part 1: Determination of manganese—Flame atomization after decomposition with acids*

JIS G 1257-2 *Part 2: Determination of phosphorus—Flame atomization indirect method after extraction of molybdophosphate*

JIS G 1257-3 *Part 3: Determination of nickel—Flame atomization after decomposition with acids*

JIS G 1257-4 *Part 4: Determination of chromium—Flame atomization after decomposition with acids*

JIS G 1257-5 *Part 5: Determination of molybdenum—Flame atomization after decomposition with acids*

JIS G 1257-6 *Part 6: Determination of copper—Flame atomization after decomposition with acids*

JIS G 1257-7 *Part 7: Determination of vanadium—Flame atomization after decomposition with acids*

JIS G 1257-8 *Part 8: Determination of cobalt—Flame atomization after decomposition with acids*

JIS G 1257-9 *Part 9: Determination of titanium—Flame atomization after decomposition with acids*

JIS G 1257-10-1 *Part 10: Determination of aluminium—Section 1: Flame atomization after decomposition with acids*

JIS G 1257-10-2 *Part 10: Determination of aluminium—Section 2: Determination of acid-soluble aluminium*

JIS G 1257-10-3 *Part 10: Determination of aluminium—Section 3: Flame atomization after separation of iron*

- JIS G 1257-10-4 *Part 10: Determination of aluminium—Section 4: Electrothermal atomization*
- JIS G 1257-11-1 *Part 11: Determination of tin—Section 1: Flame atomization after extraction of iodide*
- JIS G 1257-11-2 *Part 11: Determination of tin—Section 2: Electrothermal atomization*
- JIS G 1257-12-1 *Part 12: Determination of lead—Section 1: Flame atomization after decomposition with acids*
- JIS G 1257-12-2 *Part 12: Determination of lead—Section 2: Flame atomization after extraction of iodide*
- JIS G 1257-12-3 *Part 12: Determination of lead—Section 3: Electrothermal atomization*
- JIS G 1257-13 *Part 13: Determination of magnesium—Flame atomization after decomposition with acids*
- JIS G 1257-14 *Part 14: Determination of calcium—Flame atomization after decomposition with acids*
- JIS G 1257-15-1 *Part 15: Determination of zinc—Section 1: Flame atomization after decomposition with acids*
- JIS G 1257-15-2 *Part 15: Determination of zinc—Section 2: Flame atomization after extraction of tetra-hexylammonium iodide-trioctylamine complex*
- JIS G 1257-16-1 *Part 16: Determination of bismuth—Section 1: Flame atomization after extraction of iodide*
- JIS G 1257-16-2 *Part 16: Determination of bismuth—Section 2: Electrothermal atomization*
- JIS G 1257-17-1 *Part 17: Determination of antimony—Section 1: Flame atomization after extraction of iodide*
- JIS G 1257-17-2 *Part 17: Determination of antimony—Section 2: Electrothermal atomization*
- JIS G 1257-18-1 *Part 18: Determination of tellurium—Section 1: Flame atomization after extraction of iodide*
- JIS G 1257-18-2 *Part 18: Determination of tellurium—Section 2: Electrothermal atomization*
- JIS G 1257-19-1 *Part 19: Determination of arsenic—Section 1: Electrothermal atomization*
- JIS G 1257-19-2 *Part 19: Determination of arsenic—Section 2: Hydride generation method (to be established)*
- JIS G 1257-20 *Part 20: Determination of selenium—Electrothermal atomization*

Iron and steel—Atomic absorption spectrometric method—Part 0: General rules

Introduction

This Japanese Industrial Standard has been prepared by reviewing and reorganizing the general matters contained separately in the main body and respective Annexes of **JIS G 1257**:1994 (including the Annexes contained in Amendment 1:1999 and Amendment 2:2000), and also by adding new specification contents.

1 Scope

This Standard specifies the scopes of application of individual parts of the **JIS G 1257** standard series (hereafter referred to as “standard series”), and general matters of the standard series.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) listed below shall be applied.

JIS G 1201 *Iron and steel—General rules for analytical methods*

JIS K 0121 *General rules for atomic absorption spectrometry*

JIS K 0133 *General rules for high frequency plasma mass spectrometry*

JIS Z 8103 *Glossary of terms used in measurement*

3 Terms and definitions

For the purpose of this Standard, the terms and definitions given in **JIS G 1201**, **JIS K 0121** and **JIS Z 8103** and the following apply.

3.1 zero member

a solution, in a series of calibration solutions, to which zero volume of the standard solution of the target component is added

3.2 acid-soluble

a term used to designate the chemical species which is contained in the filtrate obtained by decomposing the sample with acid and then filtering the resultant solution

Example : Acid-soluble aluminium, acid-soluble calcium

3.3 acid-insoluble

a term used to designate the chemical species which is contained in the filtration residue obtained by decomposing the sample with acid and then filtering the resultant solution
