H 7003:2007

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Foundation of Osaka Science & Technology Center (OSTEC)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently JIS H 7003:1989 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Glossary of terms used in hydrogen absorbing alloys

JIS H 7003: 2007

1 Scope

This Japanese Industrial Standard specifies the principal terms and definitions relating to hydrogen absorbing alloys and their applications (hereafter referred to as "terms").

2 Classification

The terms shall be classified as follows.

- a) Materials and working methods
- b) Phenomena, physical properties, and structure
- c) Measuring methods
- d) Applications

3 Terms and definitions

The terms and definitions shall be as follows.
