Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by Japan Oil Recycling Co-operative (JORC)/Japanese Standards Association (JSA) with the draft based on **TS K 0010:2005** being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Reclaimed oil

Introduction

This Japanese Industrial Standard provides the common quality standard of reclaimed oil for the producer and user, to be beneficial as “protection of environment, safety and health”, “method to achieve social goals such as establishment of resource-circulating society”, “guideline for appropriate and efficient production and use”, “target of technical development”, etc.

No corresponding International Standard has been established at this point.

1 Scope

This Standard specifies reclaimed oil used as a fuel for direct heating industrial furnaces.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS K 0557 *Water used for industrial water and wastewater analysis*

JIS K 1101 *Oxygen*

JIS K 1105 *Argon*

JIS K 2251 *Crude petroleum and petroleum products — Sampling*

JIS K 2265-3 *Determination of flash point — Part 3 : Pensky-Martens closed cup method*

JIS K 2269 *Testing methods for pour point and cloud point of crude oil and petroleum products*

JIS K 2272 *Crude oil and petroleum products — Determination of ash and sulfated ash*

JIS K 2275 *Crude oil and petroleum products — Determination of water content*

JIS K 2279 *Crude petroleum and petroleum products — Determination and estimation of heat of combustion*

JIS K 2283 *Crude petroleum and petroleum products — Determination of kinematic viscosity and calculation of viscosity index from kinematic viscosity*

JIS K 2541-5 *Crude oil and petroleum products — Determination of sulfur content Part 5 : General bomb method*

JIS K 8121 *Potassium chloride (Reagent)*

JIS K 8355 *Acetic acid (Reagent)*
