Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Office & Institutional Furniture Association (JOIFA)/ Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14. Consequently **JIS S 1039:2005** is replaced with this Standard.

However, **JIS S 1039: 2005** may be applied in the JIS mark certification based on the relevant provisions of Article 19 Clause 1, etc. of the Industrial Standardization Law until April 19, 2016.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Shelves and racks

Introduction

This Japanese Industrial Standard was established in 1969 and has gone through four revisions up to the present. The last revision was made in 2005, and the revision at this time is to respond to a variety of uses and improved qualities of the products.

No corresponding International Standard has been established at this point.

1 Scope

This Standard specifies shelves and racks (hereafter referred to as shelves), excluding home shelves and industrial racks specified in **JIS Z 0620**.

Shelves herein refer to those composed mainly of the columns, shelf boards and shelf supports. They can be free-standing, disassembled and reassembled, to be used for storing books, stationary and business supplies.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

- JIS A 1531 *Furniture — Assessment of surface resistance to cold liquids*
