Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by Japan Office & Institutional Furniture Association (JOIFA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Office furniture—Seat height adjustable swivel chairs

Introduction

This Japanese Industrial Standard has been established to correspond to the establishment of **JIS S 1206** (test methods for chairs) in 2013, as well as to provide updated specifications to accommodate the diversified use conditions of chairs and improved product quality. At the same time, **JIS S 1032**, which specifies the type of chairs not covered in this Standard, has also been reviewed and revised.

No corresponding International Standard has been established at this point.

1 Scope

This Standard specifies the height-adjustable swivel chairs for offices (hereafter referred to as “chairs”).

The chairs specified in this Standard are one-person chairs intended mainly for office use composed of several main components such as a seat, a backrest, armrests and legs, whose upper part, which includes the seat, can rotate in the horizontal plane and can be adjusted in height. Knock-down type chairs are included.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.
