## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Chalkboard Industrial Association (JCIA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS S 6007** : 2004 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public or utility model right which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public or utility model right which have the said technical properties.

# Chalkboards

## Introduction

This Japanese Industrial Standard was established in 1954, and has been revised 9 times since. Since the last revision in 2004, there has been diversification in the products in Japanese market, and the revision at this time is made for the purpose of adapting the contents to correspond to the diversified products, and contributing to the improvement of the product quality.

No corresponding International Standard has been established at this point.

## 1 Scope

This Standard specifies the chalkboards with a chalkboard surface on which drawing is possible using a chalk and from which the drawing can be wiped off using a chalk eraser (hereafter referred to as the “chalkboards”).

## 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

- JIS B 0601 *Geometrical Product Specifications (GPS)—Surface texture : Profile method—Terms, definitions and surface texture parameters*
- JIS B 0651 *Geometrical Product Specifications (GPS)—Surface texture : Profile method—Nominal characteristics of contact (stylus) instruments*
