## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by the Association for Technical Aids (ATA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently JIS T 0102 : 1998 is replaced with this Standard.

This JIS document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, or utility model right. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public or utility model right.

# Glossary of terms used in assistive products for persons with disabilities

## Introduction

This Japanese Industrial Standard has been prepared based on the 4th edition of ISO 9999 published in 2007 with the addition of some terms used in assistive product not specified by the said ISO in order to reflect the conditions of use in Japan.

A list of modifications with the explanations is given in Annex JA. Moreover, Annex JA is not contained in the corresponding International Standard.

## 1 Scope

This Standard specifies the main terms and definitions related to assistive products for persons and children with disabilities, elderly persons, and home-care patients. However, this Standard excludes the terms related to prosthetics and orthotics specified in JIS T 0101.

NOTE : The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 9999:2007 *Assistive products for persons with disability — Classification and terminology* (MOD)

In addition, symbols, which denote the degree of correspondence in the contents between the relevant International Standard and JIS are IDT (identical), MOD (modified), and NEQ (not equivalent) according to ISO/IEC Guide 21-1.

## 2 Normative reference

The following standard contains provisions which, through reference in this text, constitute provisions of this Standard. The most recent edition of the Standard (including amendments) indicated below shall be applied.

JIS T 0101 *Glossary of terms used in prosthetics and orthotics*

## 3 Terms and definitions

For the purposes of this Standard, the following numbers, terms and definitions apply:

In addition, the English equivalent is only for information purpose. The blank column of the corresponding ISO No. means that the term is not specified by the corresponding International Standard.

NOTE : The symbol “—” in the definition column means that the term and definition are not specified.
