## Foreword

This Japanese Industrial Standard has been revised by the Minister of Health, Labour and Welfare and the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Safety Appliances Association (JSAA)/Japanese Standards Association (JSA) with a draft being attached, based on the provision of Article 12, paragraph (1) of the Industrial Standardization Act applied mutatis mutandis pursuant to the provision of Article 16 of the said Act. This edition replaces the previous edition (**JIS T 8125-4** : 2010), which has been technically revised.

This **JIS** document is protected by the Copyright Act.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, published patent application or utility model rights. The relevant Ministers and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, published patent application or utility model rights.

# Protective clothing for users of hand-held chainsaws — Part 4: Protective gloves

## Introduction

This Japanese Industrial Standard has been prepared based on **ISO 11393-4** : 2018, Edition 2, with some modifications of the technical contents for the convenience of users.

The dotted underlines indicate changes from the corresponding International Standard. A list of modifications with the explanations is given in Annex JA.

## 1. Scope

This Standard specifies the test methods and performance requirements for gloves that offer protection against cutting by hand-held chainsaws, including requirements for identification, marking and information required by the user of personal protective equipment. Details of chainsaw use and the selection of appropriate protective gloves are given in Annex A.

NOTE 1 Although personal protective equipment cannot provide complete protection against cutting by hand-held chainsaws, it is possible to design personal protective equipment to provide certain protective functions based on experience.

NOTE 2 The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 11393-4 : 2018 *Protective clothing for users of hand-held chainsaws — Part 4: Performance requirements and test methods for protective gloves* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and **JIS** are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21-1**.

## 2 Normative references

Part or all of the provisions of the following standards, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS T 8008 *Protective gloves — General requirements and test methods*

JIS T 8125-1 *Protective clothing for users of hand-held chainsaws — Part 1 : Test rig for testing resistance to cutting by a chainsaw*

NOTE Normative reference in the corresponding International Standard: ISO 11393-1 : 2018 *Protective clothing for users of hand-held chainsaws — Part 1: Test rig for testing resistance to cutting by a chainsaw*

ISO 7000 : 2019 *Graphical symbols for use on equipment — Registered symbols*

ISO 11393-1 *Protective clothing for users of hand-held chainsaws — Part 1: Test*
