Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public or utility model right which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public or utility model right which have the said technical properties.

Assistive products—Toilet seats attachment for squat toilets

1 Scope

This Japanese Industrial Standard specifies the toilet seat attachment for squat toilet among assistive products where the squat toilet can be used as the sit-type toilet by mounting it on the squat toilet (including the toilet placed on the floor which is raised for males to urinate standing behind).

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS K 6253 *Rubber, vulcanized or thermoplastic—Determination of hardness*

JIS T 0102 *Glossary of terms used in assistive products for persons with disabilities*

3 Terms and definitions

For the purposes of this Standard, the terms and definitions given in JIS T 0102, and the following terms and definitions apply.

3.1 body

component to support the human body, which is the device (toilet seat attachment for squat toilet) to convert the squat toilet to the sit-type toilet

3.2 lid

component to cover toilet seat

3.3 toilet seat

component to support the human body, which is the plane sustaining the force vertically acting on it mainly during excretion

4 Name of each part

The name of each part shall be in accordance with figure 1.
