Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry, through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, or utility model right. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, and the utility model right.

Assistive products for walking—Elbow crutches

Introduction

This Japanese Industrial Standard has been prepared based on the second edition of ISO 11344-1 published in 2007 with some modifications of the technical contents in order to clarify the test method.

The portions with dotted underlines in this Standard are the matters in which the contents of the corresponding International Standard have been modified. A list of modifications with the explanations is given in Annex JB. Annex JA specifies the matters not stated in the corresponding International Standard.

1 Scope

This Standard specifies elbow crutches as assistive product for walking with one leg, which consists of a forearm support and a handgrip.

NOTE 1 The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 11334-1:2007 *Assistive products for walking manipulated by one arm—Requirements and test methods—Part 1: Elbow crutches* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and JIS are IDT (identical), MOD (modified), and NEQ (not equivalent) according to ISO/IEC Guide 21-1.

NOTE 2 Lofstrand crutches are included in elbow crutches.

2 Normative reference

The following standard contains provisions which, through reference in this text, constitute provisions of this Standard. The most recent edition of the standard (including amendments) indicated below shall be applied.

JIS T 0102 *Glossary of terms used in assistive products for persons with disabilities*

NOTE : Corresponding International Standard : ISO 9999 *Assistive products for persons with disability—Classification and terminology* (MOD)

3 Terms and definitions

For the purposes of this Standard, the terms and definitions given in JIS T 0102 and the following terms and definitions apply (see figures 1 to 3).

3.1 handle

part of the crutch to which the handgrip is attached
