Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry, through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Chemical Industry Association (JCIA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS Z 7250:2005** is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Safety data sheet for chemical products — Content and order of sections

Introduction

This Japanese Industrial Standard has been prepared based on the first edition of ISO 11014 published in 2009 with some modifications of the technical contents.

ISO 11014 : 2009 is the standard prepared by revising ISO 11014-1 : 1994 to conform to “Globally Harmonized System of Classification and Labelling of Chemicals (hereafter, referred to as "GHS"), Second revised edition, Part 1, Chapter 1.5 Hazard communication : Safety data sheets” published by the United Nations Economic and Social Council in 2007.

Moreover, the third revised edition of the GHS was published in July 2009, therefore greatly altered requirements in the third revised edition of the GHS are also included in this Standard.

Taking into consideration the present state in which Safety data sheet for chemical products (hereafter, referred as "MSDS") is already widely in use, the provision that the conventional format of MSDS according to JIS Z 7250 : 2000 stays valid until the expiration date set in 2010, and that according to JIS Z 7250 : 2005 stays valid until the expiration date set in 2015 is given in NOTE 3 to clause 4 in order to minimize the confusion caused among the authors and users of MSDSs.

The portions given sidelines or dotted underlines are the matters in which the contents of the original International Standard have been modified. A list of modifications with explanations is given in Annex JA.

NOTE : In GHS, MSDS is called SDS (Safety data sheet).

1 Scope

This Standard specifies the section, content and general format of an MSDS.

This Standard does not specify a fixed format nor does it include a blank MSDS.

NOTE 1 The laws and regulations shall have precedence over this Standard.

NOTE 2 The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 11014 : 2009 *Safety data sheet for chemical products — Content and order of sections* (MOD)

The symbols which denote the degree of correspondence in the contents between the relevant International Standard and JIS are IDT (identical), MOD (modified), and NEQ (not equivalent) according to ISO/IEC Guide 21-1.
